# SIBMICRODUR

DECORATIVE MICROCEMENT

sib

# FLEXIBILITY

FOR YOU AND FOR YOUR HOME

SIBMICRODUR is an extremely versatile microcement for floor and wall surfaces. Less than 3 mm thick when applied, it is durable and highly abrasion resistant.

Due to its excellent bonding power it can also be applied to almost any kind of stable household surface including ceramics, wood, baths, countertops and sinks and furniture items as well as staircases and large areas of flooring.

The finish gives an elegant continuous appearance, creating very personal and unique environments. It's a contemporary surfacing system that allows freedom of architectural design and creativity.

# JOINTLESS

A SEAMLESS AND CRACK FREE SYSTEM

SIBMICRODUR can be applied as a solid continuous surface onto walls, floors and ceilings, without expansion joints or any other type of visible join.

Our own dedicated substrate preparation and the natural elasticity of the product result in a crack free application even on very large surfaces.

The conclusion is a smooth and seamless finish which makes maintenance and cleaning quicker and easier and is more hygienic in day to day use.

A photograph of a bedroom interior, viewed through a doorway. The room features a bed with a white duvet and four red patterned pillows. The headboard is made of light-colored wood. On top of the headboard, there are two small white figurines. The floor is a light-colored, textured material. The doorway is framed by dark wood. The overall atmosphere is warm and modern.

A UNIQUE AND CUSTOMISED

# APPLICATION

In the SIBMICRODUR application process every job is unique. Unlike other materials such as marble or wood, our SIBMICRODUR floorings are always unique and completely tailored to the client's requirements.

Almost traditional in use, the product is hand applied with a trowel; it doesn't require any modern, specialist or expensive equipment. The professional's skill is what determines the final surface appearance.

The normal application process is to apply a primer, glass mesh (on floors), SIBMICRODUR BASE, SIBMICRODUR FINO and sealer.

ADD WARMTH AND PERSONALITY TO YOUR HOME

# GENERATE IDEAS

In the creative world of SIBMICRODUR it is easy to see that anything is possible. The only constraint is the imagination of the architect or desires of the owner. The objective is always to produce unique environments which reflect the personality and lifestyle of the inhabitants.

SIBMICRODUR is all about atmosphere, that warm feeling that your home or personal environment communicates to those that visit or live around you. SIBMICRODUR helps to generate that subtle and elusive sensation.

It is as much a satisfaction to bring into being such personal ideas as it is a joy to live in these special spaces. Spaces for people to live, work and play.

# SIBMICRODUR

When compared with other microcement products available on the market today, SIBMICRODUR technology delivers much higher resistance to abrasion.

Moreover, it's also a premixed product, which reduces the risks and problems associated with on-site mixes.

## FEATURES

Hard wearing  
Very flexible  
Will not crack when drying

Hygienic and easy to clean  
Suitable for interiors and exteriors  
Extensive colour range

Impermeable

\* STANDARD

\* 3D

\* SPONGED

\* WOOD IMITATION

\* RUSTIC

## A NON-TOXIC PRODUCT

# READY TO USE

SIBMICRODUR Microcement is a premixed product. Therefore, there is no need for any further mixing which results in a more efficient and productive workflow and additionally it reduces the risks and mistakes of on-site mixtures.

Once the packaging has been opened it can be sealed again after use. SIBMICRODUR has a long shelf-life which allows continued use at a later date.

Best of all, our Microcement mixtures are developed and manufactured using solvent free products with low VOC emissions so you can be confident of using a product without toxic or harmful substances.
